## PROFESSIONAL SUMMARY

Computer Engineering graduate from Taif University with hands-on experience in AI, Computer Vision, Embedded Systems, and Back-End Development, from an award-winning autonomous underwater vehicle to operational venue platforms. Completed intensive AI training with SDAIA (with NVIDIA), Tuwaiq Academy, and the Saudi Digital Academy, covering LLMs, RAG, data engineering, and data analysis.

## EDUCATION

**Taif University** | B.Sc. Computer Engineering | Sep 2021 – Aug 2026 | GPA: 3.18 / 4.00

## WORK EXPERIENCE

**Rimal X Accelerator & Incubator** | Business Intelligence & Technical Intern | Jun 2026 – Aug 2026

- Trained across AI, Computer Vision, IoT, Networking, Cybersecurity, Drones, and Agile Management; received an official Certificate of Completion (Verification Code: RX-M-MSYVL770-BFY8).
- Developed technical operations and intelligent venue workflow systems to support incubation programs.

## PROJECTS

**Adheed – AI Diabetes Care Platform (Sehhaty Add-on Concept)** | Python, Pandas, Matplotlib • adheed.vercel.app

- Designed a platform for the Sehhaty app: AI turns insulin pump and CGM clinical reports into plain-language guidance, a doctor-visit question bank, a nutrition chatbot, and dated report history.
- Built a Python prototype that cleans CGM data for 20 patient profiles, merges HbA1c results, and generates automated PDF reports.

**AquaVenture – Autonomous Underwater Vehicle (Graduation Project)** | Taif University | Sep 2025 – May 2026 | 1st Place Winner

- Engineered a UUV integrating AI and Computer Vision for real-time marine detection, with acoustic communication to transmit telemetry and sensor data.

**Rimal Flow – Smart Booking & Venue Operations System** | Rimal X | Jun 2026 – Aug 2026

- Developed an interactive booking system with smart space mapping and automated countdown tracking.

**Movement Detection & Embedded Security System** | Taif University | Jan 2026 – May 2026

- Built an Arduino-based system to detect unauthorized entry, trigger alarms, and dispatch alerts.

**TEDx Okadh – Web-Based Ticket Scanning System** | TEDx Okadh | Feb 2026 – May 2026

- Developed a real-time web tool to scan attendee tickets, prevent duplication, and speed up check-in.

## TECHNICAL SKILLS

- **Programming:** Python, C/C++, Java, JavaScript, SQL
- **AI & Data:** Computer Vision, OpenCV, Deep Learning, Machine Learning, LLMs, RAG, LangChain, Data Engineering, R, Business Intelligence
- **Software & Web:** Back-End Development, HTML5/CSS3, REST APIs, Database Administration
- **Hardware:** Arduino, Raspberry Pi, Robotics Programming, Multisim, AutoCAD
- **Tools & Systems:** Git/GitHub, Docker, Linux, Windows, MATLAB, Networking Protocols, Cybersecurity Essentials

## CERTIFICATIONS & TRAINING

- **NVIDIA Deep Learning Institute:** Building RAG Agents with LLMs; Adding New Knowledge to LLMs; Rapid Application Development with LLMs (Sep 2026)
- **SDAIA:** Professional LLMs Training Program, AI Track, with NVIDIA (Sep 2026); Modern Data Engineering for AI Systems (Sep 2026); Machine Learning Fundamentals (Oct 2026)
- **Tuwaiq Academy:** AI Bootcamp Using Meta Tools (Oct – Nov 2026); Data Analysis with R Programming (Sep – Oct 2026)
- **Saudi Digital Academy (SDA):** AI Bootcamp in Game Design & Development
- **Cybersecurity:** ISC2 Cybersecurity Suite; Principles of Secure Coding (UC Davis, Coursera); Introduction to Cybersecurity Essentials (IBM)

## LANGUAGES

- **Arabic:** Native • **English:** Professional Working Proficiency
